- b) Price adjustment due to discounts offered in accordance with ITT 14.4;
- c) Converting the amount resulting from applying (a) and (b) above, if relevant, to a single currency in accordance with ITT 32;
- d) Price adjustment due to quantifiable non material non-conformities in accordance with ITT 30.3; and
- e) Any additional evaluation factors specified in the **TDS** and Section III, Evaluation and Qualification Criteria.

35.3 The estimated effect of the price adjustment provisions of the Conditions of Contract, applied over the period of execution of the Contract, shall not be considered in Tender evaluation.

- 35.4 Where the tender involves multiple lots or contracts, the tenderer will be allowed to tender for one or more lots (contracts). Each lot or contract will be evaluated in accordance with ITT 35.2. The methodology to determine the lowest evaluated tenderer or tenderers base done lot (contract) or based on a combination of lots (contracts), will be specified in Section III, Evaluation and Qualification Criteria. In the case of multiple lots or contracts, tenderer will be required to prepare the Eligibility and Qualification Criteria Form for each Lot.

36.0 Comparison of tenders

Kenya Wildlife Service shall compare the evaluated costs of all substantially responsive Tenders established in accordance with ITT 35.2 to determine the Tender that has the lowest evaluated cost.

37.0 Abnormally low tenders and abnormally high tenders

Abnormally Low Tenders

- 37.0 An Abnormally Low Tender is one where the Tender price, in combination with other elements of the Tender, appears so low that it raises material concerns as to the capability of the Tenderer in regards to the Tenderer's ability to perform the Contract for the offered Tender Price or that genuine competition between Tenderers is compromised.
- 37.1 In the event of identification of a potentially Abnormally Low Tender, Kenya Wildlife Service shall seek written clarifications from the Tenderer, including detailed price analyses of its Tender price in relation to the subject matter of the contract, scope, proposed methodology, schedule, allocation of risks and responsibilities and any other requirements of the Tender document.
- 37.2 After evaluation of the price analyses, in the event that Kenya Wildlife Service determines that the Tenderer has failed to demonstrate its capability to perform the Contract for the offered Tender Price, Kenya Wildlife Service shall reject the Tender.

Abnormally high tenders

- 37.3 An abnormally high tender price is one where the tender price, in combination with other constituent elements of the Tender, appears unreasonably too high to the extent that Kenya Wildlife Service is concerned that it (Kenya Wildlife Service) may not be getting value for money or it may be paying too high a price for the contract compared with market prices or that genuine competition between Tenderers is compromised.
- 37.4 In case of an abnormally high price, Kenya Wildlife Service shall make a survey of the market prices, check if the estimated cost of the contract is correct and review the Tender Documents to check if the specifications, scope of work and conditions of contract are contributory to the

abnormally high tenders. Kenya Wildlife Service may also seek written clarification from the tenderer on the reason for the high tender price. Kenya Wildlife Service shall proceed as follows:

- i) If the tender price is abnormally high based on wrong estimated cost of the contract, Kenya Wildlife Service may accept or not accept the tender depending on Kenya Wildlife Service budget considerations.
- ii) If specifications, scope of work and/or conditions of contract are contributory to the abnormally high tender prices, Kenya Wildlife Service shall reject all tenders and may retender for the contract based on revised estimates, specifications, scope of work and conditions of contract, as the case may be.

37.5 If Kenya Wildlife Service determines that the Tender Price is abnormally too high because genuine competition between tenderers is compromised (*often due to collusion, corruption or other manipulations*), Kenya Wildlife Service shall reject all Tenders and shall institute or cause competent Government Agencies to institute an investigation on the cause of the compromise, before retendering.

38.0 Unbalanced and/ or front-loaded tenders

38.0 If in Kenya Wildlife Service opinion, the Tender that is evaluated as the lowest evaluated price is seriously unbalanced and/or frontloaded, Kenya Wildlife Service may require the Tenderer to provide written clarifications. Clarifications may include detailed price analyses to demonstrate the consistency of the tender prices with the scope of works, proposed methodology, schedule and any other requirements of the Tender document.

38.1 After the evaluation of the information and detailed price analyses presented by the Tenderer, Kenya Wildlife Service may as appropriate:

- a) Accept the Tender;
- b) Require that the total amount of the Performance Security be increased at the expense of the Tenderer to a level not exceeding a 30% of the Contract Price;
- c) Agree on a payment mode that eliminates the inherent risk of Kenya Wildlife Service paying too much for undelivered works;
- d) Reject the Tender,

39.0 Qualifications of the tenderer

39.0 Kenya Wildlife Service shall determine to its satisfaction whether the eligible Tenderer that is selected as having submitted the lowest evaluated cost and substantially responsive Tender, meets the qualifying criteria specified in Section III, Evaluation and Qualification Criteria.

39.1 The determination shall be based upon an examination of the documentary evidence of the Tenderer's qualifications submitted by the Tenderer, pursuant to ITT 17. The determination shall not take into

consideration the qualifications of other firms such as the Tenderer's subsidiaries, parent entities, affiliates, subcontractors (other than Specialized Sub-contractors if permitted in the Tender document), or any other firm(s) different from the Tenderer.

39.2 An affirmative determination shall be a prerequisite for award of the Contract to the Tenderer. A negative determination shall result in disqualification of the Tender, in which event, Kenya Wildlife Service shall proceed to the Tenderer who offers a substantially responsive Tender with the next lowest evaluated price to make a similar determination of that Tenderer's qualifications to perform satisfactorily.

40.0 Lowest evaluated tender

Having compared the evaluated prices of Tenders, Kenya Wildlife Service shall determine the Lowest Evaluated Tender. The Lowest Evaluated Tender is the Tender of the Tenderer that meets the Qualification Criteria and whose Tender has been determined to be:

No other factors, methods or criteria shall be used other than specified in this tender document. The Tenderer shall provide all the information requested in the forms included in Section IV, Tendering Forms.
- 11 Kenya Wildlife Service shall use the Standard Tender Evaluation Document for Goods and Works for evaluating Tenders.
- 12 Wherever a Tenderer is required to state a monetary amount, Tenderers should indicate it in Kenya Shilling.

13 EVALUATION AND CONTRACT AWARD CRITERIA

Kenya Wildlife Service shall use the criteria and methodologies listed in this Section to evaluate tenders and arrive at the Lowest Evaluated Tender. The tender that (i) meets the qualification criteria, (ii) has been determined to be substantially responsive to the Tender Documents, and (iii) is determined to have the Lowest Evaluated Tender price shall be selected for award of contract.

2.0 PRELIMINARY EXAMINATION FOR DETERMINATION

RESPONSIVENESS.

Kenya Wildlife Service will start by examining all tenders to ensure they meet in all respects the eligibility criteria and other mandatory requirements in the ITT, and that the tender is complete in all aspects in meeting the requirements provided for in the preliminary evaluation criteria outlined below. The Standard Tender Evaluation Report Document for Goods and Works for evaluating Tenders provides very clear guide on how to deal with review of these requirements. Tenders that do not pass the Preliminary Examination will be considered non- responsive

and will not be considered further.

TENDER EVALUATION (ITT 35)

Price evaluation: in addition to the criteria listed in ITT 35.2 (a) – (d) the following criteria shall apply:

- i) **Alternative Completion Times**, if permitted under ITT13.2, will be evaluated as follows: **Not applicable.**
- ii) **Alternative Technical Solutions** for specified parts of the Works, if permitted under ITT 13.4, will be evaluated as follows: **Not applicable.**
- iii) **Other Criteria**; if permitted under ITT 35.2(j): **Not applicable.**

3.0 MULTIPLE CONTRACTS

- 3.1 Multiple contracts will be permitted in accordance with ITT 35.4. Tenderers are evaluated on basis of Lots and a lowest evaluated tenderer identified for each Lot. Kenya Wildlife Service will select one Option of the two Options listed below for award of Contracts.

OPTION 1

- i) If a tenderer wins only one Lot, the tenderer will be awarded a contract for that Lot, provided the tenderer meets the Eligibility and Qualification Criteria for that Lot.
- ii) If a tenderer wins more than one Lot, the tender will be awarded a contract for all won Lots, provided the tenderer meets the aggregate Eligibility and Qualification Criteria for all the won Lots. The tenderer will be awarded only the combinations for which the tenderer qualifies and the others will be considered for award to second lowest the tenderers.

OPTION2

KWS will consider all possible combinations of won Lots [contract(s)] and determine the combination with the lowest evaluated price. Tenders will then be awarded to the Tenderer or Tenderers in the combination provided the tenderer meets the aggregate Eligibility and Qualification Criteria for all the won Lots.

5.0 ALTERNATIVE TENDERS (ITT 13.1)

Alternative Tenders (ITT 13.1)

An alternative if permitted under ITT 3.1, will be evaluated as follows:

Kenya Wildlife Service shall consider Tenders offered for alternatives as specified in Part 2 - Works requirements. Only the technical alternatives, if any, of the Tenderer with the Best Evaluated Tender conforming to the basic technical requirements shall be considered by the procuring Entity.

6.0 MARGIN OF PREFERENCE (NOT APPLICABLE)

- 6.1 The TDS so specifies, Kenya Wildlife Service will grant a margin of preference of fifteen percent (15%) to be loaded on evaluated prices of the foreign tenderers, where the percentage of share holding of Kenyan citizens is less than fifty-one percent (51%).
- 6.2 Contractors shall be asked to provide, as part of the data for qualification, such information, including details of ownership, as shall be required to determine whether, according to the classification established by Kenya Wildlife Service, a particular contractor or group of contractor's qualifies for a margin of preference.
- 6.3 After Tenders have been received and reviewed by Kenya Wildlife Service, responsive Tenders shall be assessed to ascertain their percentage of shareholding of Kenyan citizens. Responsive tenders shall be classified into the following groups:
- 6.4 *i) Group A:* tenders offered by Kenyan Contractors and other Tenderers where Kenyan citizens hold shares of
- 6.4.1 Over fifty-one percent (51%).
- 6.4.2 *Group B:* tenders offered by foreign Contractors and other Tenderers where Kenyan citizens hold shares of
- 6.4.3 Less than fifty-one percent (51%).
- 6.5 All evaluated tenders in each group shall, as a first evaluation step, be compared to determine the lowest tender, and the lowest evaluated tender in each group shall be further compared with each other. If, as a result of this comparison, a tender from Group A is the lowest, it shall be selected for the award of contract. If a tender from Group B is the lowest, an amount equal to the percentage indicated in Item 6.1 of the respective tender price, including unconditional discounts and excluding provisional sums and the cost of day works, if any, shall be added to the evaluated price offered in each tender from Group B. All tenders shall then be compared using new prices with added prices to Group B and the lowest evaluated tender from Group A. If the tender from Group A is still the lowest tender, it shall be selected for award. If not, the lowest evaluated tender from Group B based on the first evaluation price shall be selected.

7.0 Post qualification and Contract award (ITT 39), more specifically

Tenderers shall enter basic rates for day work items in the Schedules, which rates shall apply to any quantity of day work ordered by the Engineer. Nominal quantities have been indicated against each item of daywork, and the extended total for Daywork shall be carried forward as a Provisional Sum to the Summary Total Tender Amount. Unless otherwise adjusted, payments for day work shall be subject to price adjustment in accordance with the provisions in the Conditions of Contract.

1.0 Daywork Labor

Only the time of classes of labor directly doing work ordered by the Engineer and for which they are competent to perform will be measured. The time of gangers (charge hands) actually doing work with the gangs will also be measured but not the time of foremen or other supervisory personnel.
- 1.2 The Contractor shall be entitled to payment in respect of the total time that labor is employed on daywork, calculated at the basic rates entered by the Contractor in the **Schedule of Daywork Rates: 1. Labor**, together with an additional percentage payment on basic rates representing the Contractor's profit, overheads, etc., as described below:
 - a) The basic rates for labor shall cover all direct costs to the Contractor, including (but not limited to) the amount of wages paid to such labor, transportation time, overtime, subsistence allowances, and any sums paid to or on behalf of such labor for social benefits in accordance with *[country of Procuring Entity]* law. The basic rates will be payable in local currency only.

- d) Specification for preservation of Timber (KS 02-94-1985)
- e) This special specification

1.1 CLEARING OF THE FENCE ALIGNMENT

At a corridor of Six (6) m width the fence alignment to be cleared of all vegetation and disposed from the forest boundary.

The ground within the corridor shall be leveled by grading, set so as to leave a 3m width of the corridor to either side of fence to serve as fire break and service road and sloped as is most suitable according to terrain so as to allow for surface drainage.

1.2 DRAINAGE AND EARTHWORKS

Where necessary, catch water, cutoff and side/miter drains shall be cut with an earth moving equipment or human labor to deviate off run off from the service road. Simple drainage structures (culverts or drifts) shall be constructed where identified by the supervisor.

Where necessary forming the appropriate cross sections shall involve cutting and filling and in such cases the fill shall be compacted in layers to 95% MDD ASHTO T99 in accordance with the Standard Specification for road and Bridge Construction.

2.0 FENCE DESIGN.

FENCING

Salient Sanctuary new fence is 13 Km. five (5) strand outrigger electric fence.

Fence Design Specification

The fence shall be of Outrigger Design. The electric fence shall consist of five (5) strands over and above the ground. There shall be three (3) live wires passing through the insulators with outriggers on both sides of the fence line and two (2) earth running wires. At 200m interval, the wire shall be attached to a 2m earth peg with a joint clamp. All live wires shall be attached to strain insulators at strainer assemblies and tied by joint clamps and looped across king post to the next wire tied in the same way. Galvanized staples shall be used to attach earth wires and insulators to the posts. Standard galvanized joint clamps shall be used to join the wire along the main fence line and at corners where looping shall be necessary. All joints shall be tight and of figure 8 or reef knot joint. The posts shall be pressure impregnated eucalyptus of diameter 150mm at 10m spacing as per the detailed drawings and below specification

2.1 POSTS

Line Posts

All line posts shall have a minimum diameter of 150mm and height of 2150 mm and shall be spaced at 5,000mm on level ground (slope <5%) . The spacing will be reduced to 4000mm on sloppy and undulating terrain (slope of >5%). They shall have a smooth and cylindrical surface free of knots and cracks.

The posts shall be set in holes 450mm wide by 950mm in depth in such a manner that 1200 mm will be above the ground. The posts shall be embedded all round in 1:3:6 concrete with a cover of 150mm in swampy or rock areas

Strainer Posts

Strainer shall be built where there is change in the fence alignment both horizontal and vertical change (Corner or depression) and every 200 meters on a straight line.

The strainer assembly consists of king post 3 No. strainer post and 2 No. struts. there shall all be 150 – 175 mm dia 2150 mm in height. The strainer post shall be connected to the king post by 2250 mm long 150mm diagonal strut (side arms)

Fastening shall be by means of ordinary, galvanized wire nails 125mm long. 4.0 mm heavily galvanized shall be tied in 4 rounds diagonally from the supporter post from the supporter post to the bottom of the king post and twinned to form a stay wire and held in place 50 mm heavily galvanized staple nails nailed to hold in place. The posts shall all be embedded all round in 1:3:6 concrete in a pre-dug hole measuring 525mm diameter and 950mm in depth. They shall be set in such a way that 1200 mm is above ground level. A minimum of 4 days will be allowed for the curing of the concrete during which period no external forces shall be exerted on the posts.

2.2 WIRE

2.2 WIRE.

2.2.1 Plain Wire

i) Live wire

Plain wire to be used for live wire shall be High Tensile Steel wire 2.5mm diameter heavily galvanized to a zinc coating of not less than 280gm/m² and of steel class BS 1044 or BS 1065 and tensile strength of between 1200 and 1400N. The wire shall be strained on each end on porcelain strain insulator and run through W-plastic insulators nailed to posts by use of deep sunk heavily galvanized 2" U-nails.

ii) Earth Wire

The earth wires shall be as the live wires above.

3.0 ELECTRIFICATION

i) Power Source

Source of power shall be from Kenya power mains grid where available and where not Solar/battery power may be used. One Energizer of at least Solar/ Battery Energizer of at least

58 joules stored energy mains power or solar/battery energizer of at least 16 joules stored energy shall be used. The electrics shall be housed in Uni-hut room built at intervals of 15 km where one room can power two sections running to opposite directions. 2No. Uni huts will be installed for the provision of accommodation for fence attendants who will take care of the electrics and maintenance of the fence.

Double Insulated Lead wires

Lead Wire (Under gate cable) in PVC pipe will carry power from the energizer house to the fence and the same to be used where there is any crossing like across gates, roads, grids, bridges over pass, under pass. At every passage there will be a cut out switch. The lead out cable shall be of 2.5mm diameter, double insulated in heavy duty polyethylene UV protected PVC material, put through a 25mm heavy gauge PVC pipe and laid 500mm below ground level. U-bends shall be constructed using bends, elbows and unions at points where the lead out wire goes into or comes out of the ground for the bend to face downwards.

i). Lightening Diverter

At every energizer installation there will be a set of Lightening diverter installation for protection of the electrics. The diverter shall have a well-constructed loop and choke assembly complete with PVC or unlimber supporter.

ii). Earthing for Energizer

This shall be identical to earthing for the fence but shall be provided separately using 5No. Earth pegs set at 2m spacing. At the same area there will be earthing for the lightening arrester which will consist of 6No. Pegs also at interval of 2m.

iii). Crossing Gorges

In Areas with gorges and dry river beds, there shall be a strainer assembly on either side at a height of 6m above the highest water level. The overhead fence across the valley shall be of the six electrified wires only without the mesh wire. In deep gorges and valleys fence chain dangles will be suspended under the fence to stop elephants from crossing. The number and length of the dangles will be determined by the shape and depth of the valley.

A flood gate controller will be installed at every river, gorge or valley crossing.

 - d) Any act by the Engineer in response to a Contractor's request shall be notified in writing to the Contractor within 14 days of receipt.
- 126 The following provisions shall apply:

 - d) Sub-Clause 13.4: Specifying the amount payable in each of the applicable three currencies.

 - b) If the Contractor questions any determination or instruction of an assistant, the Contractor may refer the matter to the Engineer, who shall promptly confirm, reverse or vary the determination or instruction.

14.0 Instructions of the Engineer

- 1.72 Kenya Wildlife Service shall be responsible for any errors in these specified or notified items of reference, but the Contractor shall use reasonable efforts to verify their accuracy before they are used.
- 4.73 If the Contractor suffers delay and/or incurs Cost from executing work which was necessitated by an error in these items of reference, and an experienced contractor

If and to the extent that these more favorable conditions were encountered, the Engineer may proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine the reductions in Cost which were due to these conditions, which may be included (as deductions) in the Contract Price and Payment Certificates. However, the net effect of all adjustments under sub-paragraph (b) and all these reductions, for all the physical conditions encountered in similar parts of the Works, shall not result in a net reduction in the Contract Price.

4.127 The Engineer shall take account of any evidence of the physical conditions foreseen by the Contractor when submitting the Tender, which shall be made available by the Contractor, but shall not be bound by the Contractor's interpretation of any such evidence.

8.4 Extension of Time for Completion

- 841 The Contractor shall be entitled subject to Sub-Clause 20.1 [Contractor's Claims] to an extension of the Time for Completion if and to the extent that completion for the purposes of Sub-Clause 10.1 [Taking Over of the Works and Sections] is or will be delayed by any of the following causes:

862 Unless the Engineer notifies otherwise, the Contractor shall adopt these revised methods, which may require increases in the working hours and/or in the numbers of Contractor's Personnel and/or Goods, at the risk and cost of the Contractor. If these revised methods cause Kenya Wildlife Service to incur additional costs, the Contractor shall, subject to notice under Sub-Clause 2.5 [Kenya Wildlife Service Claims], pay these costs to Kenya Wildlife Service, in addition to delay damages (if any) under Sub-Clause 8.7 below.

863 Additional costs of revised methods including acceleration measures, instructed by the Engineer to reduce delays resulting from causes listed under Sub-Clause 8.4 [Extension of Time for Completion] shall be paid by Kenya Wildlife Service, without generating, however, any other additional payment benefit to the Contractor.

If the Engineer does not give permission within 30 days after being requested to do so, the Contractor may, by giving notice to the Engineer, treat the suspension as an omission under Clause 13 [Variations and Adjustments] of the affected part of the Works. If the suspension affects the whole of the Works, the Contractor may give notice of termination under Sub-Clause 16.2 [Termination by Contractor].

8.12 Resumption of Work

After the permission or instruction to proceed is given, the Contractor and the Engineer shall jointly examine the Works and the Plant and Materials affected by the suspension. The Contractor shall carry out the Tests on such day or days within that period as the Contractor may fix and of which he shall give notice to the Engineer.
- 6.1.3 If the Contractor fails to carry out the Tests on Completion within the period of 21 days, Kenya Wildlife Service Personnel may proceed with the Test at the risk and cost of the Contractor. The Tests on Completion shall then be deemed to have been carried out in the presence of the Contractor and the results of the Tests shall be accepted as accurate.

6.2 Retesting of related works

If the Works, or a Section, fail to pass the Tests on Completion, Sub-Clause 7.5 [Rejection] shall apply, and the Engineer or the Contractor may require the failed Tests, and Tests on Completion on any related work, to be repeated under the same terms and conditions.

- 7.1.2 Kenya Wildlife Service shall not use any part of the Works (other than as a temporary measure which is either specified in the Contract or agreed by both Parties) unless and until the Engineer has issued a Taking-Over Certificate for this part. However, if Kenya Wildlife Service does use any part of the Works before the Taking-Over Certificate is issued:
- a) The part which is used shall be deemed to have been taken over as from the date on which it is used,
 - b) the Contractor shall cease to be liable for the care of such part as from this date, when responsibility shall pass to Kenya Wildlife Service, and
 - c) if requested by the Contractor, the Engineer shall issue a Taking-Over Certificate for this part.
- 7.1.3 After the Engineer has issued a Taking-Over Certificate for a part of the Works, the Contractor shall be given the earliest opportunity to take such steps as may be necessary to carry out any outstanding Tests on Completion. The Contractor shall carry out these Tests on Completion as soon as practicable before the expiry date of the relevant Defects Notification Period.
- 7.1.4 If the Contractor incurs Cost as a result of Kenya Wildlife Service taking over and/or using a part of the Works, other than such use as is specified in the Contract agreed by the Contractor, the Contractor shall (i) give notice to the Engineer and (ii) be entitled subject to Sub-Clause 20.1 [Contractor's Claims] to payment of any such accrued costs, which shall be included in the Contract Price. After receiving this notice, the Engineer shall proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine this accrued cost.

- 7.1.5 If a Taking-Over Certificate has been issued for a part of the Works (other than a Section), the delay damages there after for completion of the remainder of the Works shall be reduced. Similarly, the delay damages for the remainder of the Section (if any) in which this part is included shall also be reduced. For any period of delay after the date stated in this Taking-Over Certificate, the proportional reduction in these delay damages shall be calculated as the proportion which the value of the part so certified bears to the value of the Works or Section (as the case may be) as a whole. The Engineer shall proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine these proportions. The provisions of this paragraph shall only apply to the daily rate of delay damages under Sub-Clause 8.7 [Delay Damages] and shall not affect the maximum amount of these damages.

7.2 Interference with Tests on Completion

- 7.2.1 If the Contractor is prevented, for more than 14 days, from carrying out the Tests on Completion by a cause for which Kenya Wildlife Service is responsible, Kenya Wildlife Service shall be deemed to have taken over the Works or Section (as the case may be) on the date when the Tests on Completion would otherwise have been completed.
- 7.2.2 The Engineer shall then issue a Taking-Over Certificate accordingly, and the Contractor shall carry out the Tests on Completion as soon as practicable, before the expiry date of the Defects Notification Period. The Engineer shall require the Tests on Completion to be carried out by giving 14 days' notice and in accordance with the relevant provisions of the Contract.
- 7.2.3 If the Contractor suffers delay and/or incurs Cost as a result of this delay in carrying out the Tests on Completion, the Contractor shall give notice to the Engineer and shall be entitled subject to Sub-Clause 20.1 [Contractor's Claims] to:
- a) an extension of time for any such delay, if completion is or will be delayed, under Sub-Clause 8.4 [Extension of Time for Completion], and
 - b) Payment of any such accrued costs, which shall be included in the Contract Price.
- 7.2.4 After receiving this notice, the Engineer shall proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine these matters.

7.3 Surfaces Requiring Reinstatement

Except as otherwise stated in a Taking-Over Certificate, a certificate for a Section or part of the Works shall not be deemed to certify completion of any ground or other surfaces requiring reinstatement.

8 DEFECTS LIABILITY

8.0 Completion of Outstanding Work and Remedying Defects

- 8.0.1 In order that the Works and Contractor's Documents, and each Section, shall be in

the condition required by the Contract (fairwear and tear excepted) by the expiry date of the relevant Defects Notification Period or as soon as practicable there after, the Contractor shall:

- a) complete any work which is outstanding on the date stated in a Taking-Over Certificate, within such reasonable time as is instructed by the Engineer, and
- b) Execute all work required to remedy defects or damage, as may be notified by (or on behalf of) Kenya Wildlife Service on or before the expiry date of the Defects Notification Period for the Works or Section (as the case may be).

8.02 If a defect appears or damage occurs, the Contractor shall be notified accordingly by the Engineer.

8.1 Cost of Remedying Defects

8.1.1 All work referred to in sub-paragraph (b) of Sub-Clause 11.1 [Completion of Outstanding Work and Remedying Defects] shall be executed at the risk and cost of the Contractor, if and to the extent that the work is attributable to:

- a) Any design for which the Contractor is responsible,
- b) Plant, Materials or workmanship not being in accordance with the Contract, or
- c) Failure by the Contractor to comply with any other obligation.

8.1.2 If and to the extent that such work is attributable to any other cause, the Contractor shall be notified promptly by (or on behalf of) Kenya Wildlife Service, and Sub-Clause 13.3 [Variation Procedure] shall apply.

8.2 Extension of Defects Notification Period

8.2.1 Kenya Wildlife Service shall be entitled subject to Sub-Clause 2.5 [Kenya Wildlife Service Claims] to an extension of the Defects Notification Period for the Works or a Section if and to the extent that the Works, Section or a major item of Plant (as the case may be, and after taking over) cannot be used for the purposes for which they are intended by reason of a defect or by reason of damage attributable to the Contractor. However, a Defects Notification Period shall not be extended by more than two years.

8.2.2 If delivery and/ or erection of Plant and/ or Materials was suspended under Sub-Clause 8.8 [Suspension of Work] or Sub-Clause 16.1 [Contractor's Entitlement to Suspend Work], the Contractor's obligations under this Clause shall not apply to any defects or damage occurring more than two years after the Defects Notification Period for the Plant and/ or Materials would otherwise have expired.

8.3 Failure to Remedy Defects

8.3.1 If the Contractor fails to remedy any defect or damage within a reasonable time, a date may be fixed by the Engineer, on or by which the defect or damage is to be remedied. The Contractor shall be given reasonable notice of this date.

- 8.3.2 If the Contractor fails to remedy the defect or damage by this notified date and this remedial work was to be executed at the cost of the Contractor under Sub-Clause 11.2 [Cost of Remedying Defects], Kenya Wildlife Service may (at his option):
- (a) Carry out the work itself or by others, in a reasonable manner and at the Contractor's cost, but the Contractor shall have no responsibility for this work; and the Contractor shall be subject to Sub-Clause 2.5 [Kenya Wildlife Service Claims] pay to Kenya Wildlife Service the costs reasonably incurred by Kenya Wildlife Service in remedying the defect or damage;
 - (b) Require the Engineer to agree or determine a reasonable reduction in the Contract Price in accordance with Sub-Clause 3.5 [Determinations]; or
 - (c) if the defect or damage deprives Kenya Wildlife Service of substantially the whole benefit of the Works or any major part of the Works, terminate the Contract as a whole, or in respect of such major part which cannot be put to the intended use. Without prejudice to any other rights, under the Contract otherwise, Kenya Wildlife Service shall then be entitled to recover all sums paid for the Works or for such part (as the case may be), plus financing costs and the cost of dismantling the same, clearing the Site and returning Plant and Materials to the Contractor.

8.4 Removal of Defective Work

If the defective damage cannot be remedied expeditiously on the Site and Kenya Wildlife Service gives consent, the Contractor may remove from the Site for the purposes of repair such items of Plant as are defective or damaged. This consent may require the Contractor to increase the amount of the Performance Security by the full replacement cost of these items, or to provide other appropriate security.

8.5 Further Tests

- 8.5.1 If the work of remedying of any defective damage may affect the performance of the Works, the Engineer may require the repetition of any of the tests described in the Contract. The requirement shall be made by notice within 14 days after the defect or damage is remedied.
- 8.5.2 These tests shall be carried out in accordance with the terms applicable to the previous tests, except that they shall be carried out at the risk and cost of the Party liable, under Sub-Clause 11.2 [Cost of Remedying Defects], for the cost of the remedial work.

8.6 Right of Access

Until the Completion Certificate has been issued, the Contractor shall have such right of access to the Works as is reasonably required in order to comply with this Clause, except as may be inconsistent with Kenya Wildlife Service reasonable security restrictions.

8.7 Contractor to Search

The Contractor shall, if required by the Engineer, search for the cause of any defecton parts of the works that have already accepted, under the direction of the Engineer. Unless the defect is to be remedied at the cost of the Contractor under Sub-Clause 11.2 [Cost of Remedying Defects], the Cost of the search plus profit shall be agreed or determined by the Engineer in accordance with Sub-Clause 3.5 [Determinations] and shall be included in the Contract Price.

8.8 Completion Certificate

- 8.8.1 Performance of the Contractor's obligations shall not be considered to have been completed until the Engineer has issued the Completion Certificate to the Contractor, stating the date on which the Contractor completed his obligations under the Contract.
- 8.8.2 The Engineer shall issue the Completion Certificate within 30days after the latest of the expiry dates of the Defects Liability Period, or as soon there after as the Contractor has supplied all the Contractor's Documents and completed and tested all the Works, including remedying any defects. A copy of the Completion Certificate shall be issued to Kenya Wildlife Service.
- 8.8.3 Only the Completion Certificate shall be deemed to constitute acceptance of the Works.

8.9 Unfulfilled Obligations

After the Completion Certificate has been issued, each Party shall remain liable for the fulfilment of any obligation which remains unperformed at that time. For the purposes of determining the nature and extent of unperformed obligations, the Contract shall be deemed to remain in force.

8.10 Clearance of Site

- 8.10.1 Upon receiving the Completion Certificate, the Contractor shall remove any remaining Contractor's Equipment, surplus material, wreckage, rubbish and Temporary Works from the Site.
- 8.10.2 If all these items have not been removed within 30 days after receipt by the Contractor of the Completion Certificate, Kenya Wildlife Service may sell or otherwise dispose of any remaining items. Kenya Wildlife Service shall be entitled to be paid the costs incurred in connection with, or attributable to, such sale or disposal and restoring the Site.
- 8.10.3 Any balance of the moneys from the sale shall be paid to the Contractor. If these moneys are less than Kenya Wildlife Service costs, the Contractor shall pay the outstanding balance to Kenya Wildlife Service.

9 MEASUREMENT AND EVALUATION

9.0 Works to be Measured

- 9.01 The Works shall be measured, and valued for payment, in accordance with this Clause. The Contractor shall show in each application under Sub-Clauses 14.3 [Application for Interim Payment Certificates], 14.10 [Statement on Completion] and 14.11 [Application for Final Payment Certificate] the quantities and other particulars detailing the amounts which he considers to be entitled under the Contract.
- 9.02 Whenever the Engineer requires any part of the Works to be measured, reasonable notice shall be given to the Contractor's Representative, who shall:
- a) promptly either attend or send another qualified representative to assist the Engineer in making the measurement, and
 - b) Supply any particulars requested by the Engineer.
- 9.03 If the Contractor fails to attend or send a representative, the measurement made by the Engineer shall be accepted as accurate.
- 9.04 Except as otherwise stated in the Contract, wherever any Permanent Works are to be measured from records, these shall be prepared by the Engineer. The Contractor shall, as and when requested, attend to examine and agree the records with the Engineer, and shall sign the same when agreed. If the Contractor does not attend, the records shall be accepted as accurate.
- 9.05 If the Contractor examines and disagrees the records, and/ or does not sign them as agreed, then the Contractor shall give notice to the Engineer of the respects in which the records are asserted to be inaccurate. After receiving this notice, the Engineer shall review the records and either confirm or vary them and certify the payment of the undisputed part. If the Contractor does not so give notice to the Engineer within Fourteen (14) days after being requested to examine the records, they shall be accepted as accurate.

9.1 Method of Measurement

Except as otherwise stated in the Contract:

- a) Measurement shall be made of the net actual quantity of each item of the Permanent Works, and
- b) The method of measurement shall be in accordance with the Bill of Materials or other applicable Schedules.

9.2 Evaluation

- 9.21 Except as otherwise stated in the Contract, the Engineer shall proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine the value of work done by evaluating each item of work, applying the measurement agreed or determined in accordance with the above Sub-Clauses 12.1 and 12.2 and the appropriate rate or price for the item.

- 9.22 For each item of work, the appropriate rate or price for the item shall be the rate or price specified for such item in the Contractor, if there is no such item, specified for similar work.
- 9.23 Any item of work included in the Bill of Quantities for which no rate or price was specified shall be considered as included in other rates and prices in the Bill of Quantities and will not be paid for separately.
- 9.24 However, for a new item of work, a new rate or price shall be appropriate for such item of work if:
- a) The work is instructed under Clause 13 [Variations and Adjustments],
 - b) no rate or price is specified in the Contract for this item, and
 - c) No specified rate or price is appropriate because the item of work is not of similar character, or is not executed under similar conditions, as any item in the Contract.
- 9.25 Each new rate or price shall be derived from any relevant rates or prices in the Contract. If no rates or prices are relevant for the new item of work, it shall be derived from the reasonable Cost of executing such work, prevailing market rates, together with profit, taking account of any other relevant matters.
- 9.26 Until such time as an appropriate rate or price is agreed or determined, the Engineer shall determine a provisional rate or price for the purposes of Interim Payment Certificates as soon as the concerned work commences.
- 9.27 Where the contract price is different from the corrected tender price, in order to ensure the contractor is not paid less or more relative to the contract price (*which would be the tender price*), payment valuation certificates and variation orders on omissions and additions valued based on rates in the Bill of Quantities or schedule of rates in the Tender, will be adjusted by a plus or minus percentage. The percentage already worked out during tender evaluation is worked out as follows: (*corrected tender price – tender price*) / *tender price* X 100.

9.3 Omissions

Whenever the omission of any work forms part (or all) of a Variation, the value of which has not been agreed, if:

- a) The Contractor will incur (or has incurred) cost which, if the work had not been omitted, would have been deemed to be covered by a sum forming part of the Accepted Contract Amount;
- b) The omission of the work will result (or has resulted) in this sum not forming part of the Contract Price; and
- c) This cost is not deemed to be included in the evaluation of any substituted work; then the Contractor shall give notice to the Engineer accordingly, with supporting particulars. Upon receiving this notice, the Engineer shall proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine this cost, which shall be included in the Contract Price.

10. VARIATIONS AND ADJUSTMENTS

10.0 Right to Vary

10.0.1 Variations may be initiated by the Engineer at any time prior to issuing the Taking-Over Certificate for the Works, either by an instruction or by a request for the Contractor to submit a proposal. No Variation instructed by the Engineer under this Clause shall in any way vitiate or invalidate the Contract.

10.0.2 The Contractor shall execute and be bound by each Variation, unless the Contractor promptly gives notice to the Engineer stating (with supporting particulars) that (i) the Contractor cannot readily obtain the Goods required for the Variation, or (ii) such Variation triggers a substantial change in the sequence or progress of the Works. Upon receiving this notice, the Engineer shall cancel, confirm or vary the instruction.

10.0.3 Each Variation may include:

- a) changes to the quantities of any item of work included in the Contract (however, such changes do not necessarily constitute a Variation),
- b) changes to the quality and other characteristics of any item of work,
- c) changes to the levels, positions and/ or dimensions of any part of the Works,
- d) omission of any work unless it is to be carried out by others,
- e) any additional work, Plant, Materials or services necessary for the Permanent Works, including any associated Tests on Completion, boreholes and other testing and exploratory work, or
- f) Changes to the sequence or timing of the execution of the Works.

10.0.4 The Contractor shall not make any alteration and/or modification of the Permanent Works, unless and until the Engineer instructs after obtaining approval of Kenya Wildlife Service.

13.2 Variation Order Procedure

13.2.1 Prior to any Variation Order under Sub-Clause 13.1.4 the Engineer shall notify the Contractor of the nature and form of such variation. As soon as possible after having received such notice, the Contractor shall submit to the Engineer:

- a) A description of work, if any, to be performed and a programme for its execution, and
- b) the Contractor's proposals for any necessary modifications to the Programme according to Sub-Clause 8.3 or to any of the Contractor's obligations under the Contract, and
- c) The Contractor's proposals for adjustment to the Contract Price.

Following the receipt of the Contractor's submission the Engineer shall, after due consultation with the Employer and the Contractor, decide as soon as possible whether or not the variation shall be carried out. If the Engineer decides that the variation shall be carried out, he shall issue a Variation Order clearly identified as

such in accordance with the Contractor's submission or as modified by agreement.

If the Engineer and the Contractor are unable to agree the adjustment of the Contract Price, the provisions of Sub-Clause 13.2.2 shall apply.

13.2.2 Disagreement on Adjustment of the Contract Price

If the Contractor and the Engineer unable to agree on the adjustment of the Contract Price, the adjustment shall be determined in accordance with the rates specified in the Bills of Quantities or Schedule of Daywork Prices. If the rates contained in the Bills of Quantities or Dayworks Prices are not directly applicable to the specific work in question, suitable rates shall be established by the Engineer reflecting the level of pricing in the Dayworks Prices. Where rates are not contained in the said Prices, the amount shall be such as is in all the circumstances reasonable, reflecting a market price. Due account shall be taken of any over-or under-recovery of overheads by the Contractor in consequence of the variation. The Contractor shall also be entitled to be paid:

- a) The cost of any partial execution of the Work rendered useless by any such variation,
- b) The cost of making necessary alterations to Plant already manufactured or in the course of manufacture or of any work done that has to be altered in consequence of such a variation,
- c) any additional costs incurred by the Contractor by the disruption of the progress of the Works as detailed in the Programme, and
- d) The net effect of the Contractor's financial costs, including interest, caused by the variation.

The Engineer shall on this basis determine the rates or prices to enable on-account payment to be included in certificates of payment.

13.2.3 Contractor to Proceed

On receipt of a Variation Order, the Contractor shall forthwith proceed to carry out the variation and be bound to these Conditions in so doing as if such variation was stated in the Contract. The work shall not be delayed pending the granting of an extension of the Time for Completion or an adjustment to the Contract Price under Sub-Clause 13.3.

13.3 Value Engineering

- 13.3.1 The Contractor may, at any time, submit to the Engineer written proposal which (in the Contractor's opinion) will, if adopted, (i) accelerate completion, (ii) reduce the cost to Kenya Wildlife Service of executing, maintaining or operating the Works, (iii) improve the efficiency or value to Kenya Wildlife Service of the completed Works, or (iv) Otherwise be of benefit to Kenya Wildlife Service.
- 13.3.2 The proposal shall be prepared at the cost of the Contractor and shall include the items listed in Sub-Clause 13.3 [Variation Procedure].

- 13.2.3 If a proposal, which is approved by the Engineer, includes a change in the design of part of the Permanent Works, then unless otherwise agreed by both Parties:
- a) The Contractor shall design this part,
 - b) sub-paragraphs (a) to (d) of Sub-Clause 4.1 [Contractor's General Obligations] shall apply, and
 - c) if this change results in a reduction in the contract value of this part, the Engineer shall proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine a fee, which shall be included in the Contract Price. This fee shall be half (50%) of the difference between the following amounts:
 - i) such reduction in contract value, resulting from the change, excluding adjustments under Sub-Clause 13.8 [Adjustments for Changes in Legislation] and Sub-Clause 13.8 [Adjustments for Changes in Cost], and
 - ii) the reduction (if any) in the value to Kenya Wildlife Service of the varied works, taking account of any improvement in quality, anticipated life or operational efficiencies.
- 13.3.3 However, if the amount established in item 13.2.3 (c) (i) is less than amount established in item 13.2.3 (c) (ii), there shall not be a fee. However, if the amount established in item 13.2.3 (c) (i) is more than amount established in item 13.2.3 (c) (ii), it shall result in a price variation to Kenya Wildlife Service .

13.4 Variation Procedure for Value Engineering proposal

- 13.4.1 If the Engineer requests a proposal, prior to instructing a Variation, the Contractor shall respond in writing as soon as practicable, either by giving reasons why he cannot comply (if this is the case) or by submitting:
- a) A description of the proposed work to be performed and a programme for its execution,
 - b) the Contractor's proposal for any necessary modifications to the programme according to Sub-Clause 8.3 [Programme] and to the Time for Completion, and
 - c) The Contractor's proposal for evaluation of the Variation.
- 13.4.2 The Engineer shall, as soon as practicable after receiving such proposal (under Sub-Clause 13.2 [Value Project Engineering] or otherwise), respond with approval, disapproval or comments. The Contractor shall not delay any work whilst waiting a response.
- 13.4.3 Each instruction to execute a Variation, with any requirements for the recording of Costs, shall be issued by the Engineer to the Contractor, who shall acknowledge receipt.
- 13.4.4 Each Variation shall be evaluated in accordance with Clause 12 [Measurement and Evaluation], unless the Engineer instructs or approves otherwise in accordance with this Clause.

135 Payment in Applicable Currencies

If the Contract provides for payment of the Contract Price in more than one currency, then whenever an adjustment is agreed, approved or determined as stated above, the amount payable in each of the applicable currencies shall be specified. For this purpose, reference shall be made to the actual or expected currency proportions of the Cost of the varied work, and to the proportions of various currencies specified for payment of the Contract Price.

136 Provisional Sums

13.6.1 Each Provisional Sum shall only be used, in whole or in part, in accordance with the Engineer instructions, and the Contract Price shall be adjusted accordingly. The total sum paid to the Contractor shall include only such amounts, for the work, supplies or services to which the Provisional Sum relates, as the Engineer shall have instructed. For each Provisional Sum, the Engineer May instruct:

- a) Work to be executed (including Plant, Materials or services to be supplied) by the Contractor and valued under Sub-Clause 13.3 [Variation Procedure]; and/or
- b) Plant, Materials or services to be purchased by the Contractor, from a nominated Subcontractor (as defined in Clause 5 [Nominated Subcontractors]) or otherwise; and for which there shall be included in the Contract Price:
 - i) The actual amounts paid (or due to be paid) by the Contractor, and
 - ii) a sum for overhead charges and profit, calculated as a percentage of these actual amounts by applying the relevant percentage rate (if any) stated in the appropriate Schedule. If there is no such rate, the percentage rate stated in **the Special Conditions of Contract** shall be applied.

13.6.2 The Contractor shall, when required by the Engineer, produce quotations, invoices, vouchers and accounts or receipts in substantiation.

137 Dayworks

13.7.1 For work of a minor or incidental nature, the Engineer may instruct that a Variation shall be executed on a daywork basis. The work shall then be valued in accordance with the Daywork Schedule included in the Contract, and the following procedure shall apply. If a Daywork Schedule is not included in the Contract, this Sub-Clause shall not apply.

13.7.2 Before ordering Goods for the work, the Contractor shall submit quotations to the Engineer. When applying for payment, the Contractor shall submit invoices, vouchers and accounts or receipts for any Goods.

13.7.3 Except for any items for which the Daywork Schedule specifies that payment is not

due, the Contractor shall deliver each day to the Engineer accurate statements induplicate which shall include the following details of the resources used in executing the previous day's work:

- a) The names, occupations and time of Contractor's Personnel,
- b) the identification, type and time of Contractor's Equipment and Temporary Works, and
- c) the quantities and types of Plant and Materials used.

13.7.4 One copy of each statement will, if correct, or when agreed, be signed by the Engineer and returned to the Contractor. The Contractor shall then submit priced statements of these resources to the Engineer, prior to their inclusion in the next Statement under Sub-Clause 14.3 [Application for Interim Payment Certificates].

13.8 Adjustments for Changes in Legislation

13.8.1 The Contract Price shall be adjusted to take account of any increase or decrease in Cost resulting from a change in the Laws of Kenya (including the introduction of new Laws and the repeal or modification of existing Laws) or in the judicial or official governmental interpretation of such Laws, made after the Base Date, which affect the Contractor in the performance of obligations under the Contract.

13.8.2 If the Contractor suffers (or will suffer) delay and/or incurs (or will incur) additional Cost as a result of these changes in the Laws or in such interpretations, made after the Base Date, the Contractor shall give notice to the Engineer and shall be entitled subject to Sub-Clause 20.1 [Contractor's Claims] to:

- a) an extension of time for any such delay, if completion is or will be delayed, under Sub-Clause 8.4 [Extension of Time for Completion], and
- b) Payment of any such Cost, which shall be included in the Contract Price.

13.8.3 After receiving this notice, the Engineer shall proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine these matters.

13.8.4 Notwithstanding the foregoing, the Contractor shall not be entitled to an extension of time if the relevant delay has already been taken into account in the determination of a previous extension of time and such Cost shall not be separately paid if the same shall already have been taken into account in the indexing of any inputs to the table of adjustment data in accordance with the provisions of Sub-Clause 13.8 [Adjustments for Changes in Cost].

13.9 Adjustments for Changes in Cost

13.9.1 In this Sub-Clause, "table of adjustment data" means the completed table of adjustment data for local and foreign currencies included in the Schedules. If there is no such table of adjustment data, this Sub-Clause shall not apply.

13.9.2 If this Sub-Clause applies, the amounts payable to the Contractor shall be adjusted for rises or falls in the cost of labor, Goods and other inputs to the Works, by the addition or deduction of the amounts determined by the formulae prescribed in this Sub-Clause. To the extent that full compensation for any rise or fall in Costs is not

covered by the provisions of this or other Clauses, the Accepted Contract Amount shall be deemed to have included a mounts to cover the contingency of other rises and falls in costs.

- 1393 The adjustment to be applied to the amount otherwise payable to the Contractor, as valued in accordance with the appropriate Schedule and certified in Payment Certificates, shall be determined from formulae for each of the currencies in which the Contract Price is payable. No adjustment is to be applied to work valued on the basis of Cost or current prices. The formulae shall be of the following general type

Price Adjustment Formula

Prices shall be adjusted for fluctuations in the cost of inputs only if **provided for in the SCC**. If so provided, the amounts certified in each payment certificate, before deducting for Advance Payment, shall be adjusted by applying the respective price adjustment factor to the payment amounts due in each currency. A separate formula of the type specified below applies:

$$P = A + B \text{ Im/Io}$$

where:

P is the adjustment factor for the portion of the Contract Price payable.

A and **B** a recoefficients **specified in the SCC**, representing then on adjustable and adjustable portions, respectively, of the Contract Price payable and

I m is the index prevailing at the end of the month being invoiced and **Ioc** is the index prevailing 30 days before Bid opening for inputs payable.

NOTE: The sum of the two coefficients A and B should be 1 (one) in the formula for each currency. Normally, both coefficients shall be the same in the formulae for all currencies, since coefficient A, for the non adjustable portion of the payments, is a very approximate figure (usually 0.15) to take account of fixed cost elements or other nonadjustable components. The sum of the adjustments for each currency are added to the Contract Price.

- 1394 The cost indices or reference prices stated in the table of adjustment data shall be used. If their source is in doubt, itshall be determined by the Engineer. Forth is purpose, reference shall be made to the values of the indices at stated dates (quoted in the fourth and fifth columns respectively of the table) for the purposes of clarification of the source; although these dates (and thus these values) may not correspond to the base cost indices.
- 1395 Incases where the “currency of index” is not the relevant currency of payment, each index shall be converted into the relevant currency of payment at the selling rate, established by the Central Bank of Kenya, of this relevant currency on the above date for which the index is required to be applicable.
- 1396 Until such time as each current cost index is available, the Engineer shall determine a provisional index for the issue of Interim Payment Certificates. When a current cost index is available, the adjustment shall be recalculated accordingly.

- 13.9.7 If the Contractor fails to complete the Works within the Time for Completion, adjustment of prices there after shall be made using either (i) each index or price applicable on the date 49 days prior to the expiry of the Time for Completion of the Works, or (ii) the current index or price, whichever is more favorable to Kenya Wildlife Service. The weightings (coefficients) for each of the factors of cost stated in the table(s) of adjustment data shall only be adjusted if they have been rendered unreasonable, unbalanced or inapplicable, as a result of Variations.

11. CONTRACT PRICE AND PAYMENT

11.0 The Contract Price

11.0.1 Unless otherwise stated in the Special Conditions:

- a) The value of the payment certificate shall be agreed or determined under Sub-Clause 12.3 [Evaluation] and be subject to adjustments in accordance with the Contract;
- b) the Contractor shall pay all taxes, duties and fees required to be paid by him under the Contract, and the Contract Price shall not be adjusted for any of these costs except as stated in Sub-Clause 13.7 [Adjustments for Changes in Legislation];
- c) any quantities which may be set out in the Bill of Quantities or other Schedule are estimated quantities and are not to be taken as the actual and correct quantities
 - i) of the Works which the Contractor is required to execute, or
 - ii) for the purposes of Clause 12 [Measurement and Evaluation]; and
- d) The Contractor shall submit to the Engineer, within 30 days after the Commencement Date, a proposed breakdown of each lump sum price in the Schedules. The Engineer may take account of the breakdown when preparing Payment Certificates but shall not be bound by it.

11.0.2 Notwithstanding the provisions of subparagraph (b), Contractor's Equipment, including essential spare parts there for, imported by the Contractor for the sole purpose of executing the Contract shall not be exempt from the payment of import duties and taxes upon importation.

11.1 Advance Payment

11.1.1 Kenya Wildlife Service shall make an advance payment, as an interest-free loan for mobilization and cashflow support, when the Contractor submits a guarantee in accordance with this Clause. The total advance payment, the number and timing of instalments (if more than one), and the applicable currencies and proportions, shall

be as stated in the **Special Conditions of Contract**.

- 11.1.2 Unless and until Kenya Wildlife Service receives this guarantee, or if the total advance payment is not stated in the Special Conditions of Contract, this Sub-Clause shall not apply.

15 INSURANCE

15.0 General Requirements for Insurances

- 15.0.1 In this Clause, “insuring Party” means, for each type of insurance, the Party responsible for effecting and maintaining the insurance specified in the relevant Sub-Clause.
- 15.0.2 Wherever the Contractor is the insuring Party, each insurance shall be effected with insurers and in terms approved by Kenya Wildlife Service. These terms shall be consistent with any terms agreed by both Parties before the date of the Letter of Acceptance. This agreement of terms shall take precedence over the provisions of this Clause.
- 15.0.3 Wherever Kenya Wildlife Service is the insuring Party, each insurance shall be effected with insurers and in terms acceptable to the Contractor. - 15.13 The insuring Party shall insure the Contractor's Equipment for not less than the full replacement value, including delivery to Site. For each item of Contractor's Equipment, the insurance shall be effective while it is being transported to the Site and until it is no longer required as Contractor's Equipment.

 - ii) a part of the Works which is lost or damaged in order to reinstate any other part of the Works if this other part is in a defective condition due to a defect in its design, materials or workmanship,
 - iii) a part of the Works which has been taken over by Kenya Wildlife Service, except to the extent that the Contractor is liable for the loss or damage, and
 - iv) Goods while they are not in Kenya, subject to Sub-Clause 14.5 [Plant and Materials intended for the Works].
- 15.15 If, more than one year after the Base Date, the cover described in sub-paragraph (d) above ceases to be available at commercially reasonable terms, the Contractor shall (as insuring Party) give notice to Kenya Wildlife Service, with supporting particulars. Kenya Wildlife Service shall then (i) be entitled subject to Sub-Clause 2.5 [Kenya Wildlife Service Claims] to payment of an amount equivalent to such

commercially reasonable terms as the Contractor should have expected to have paid for such cover, and (ii) be deemed, unless he obtains the cover at commercially reasonable terms, to have approved the omission under Sub-Clause 18.1 [General Requirements for Insurances].

15.2 Insurance against Injury to Persons and Damage to Property

- 15.2.1 The insuring Party shall insure against each Party's liability for any loss, damage, death or bodily injury which may occur to any physical property (except things insured under Sub-Clause 18.2 [Insurance for Works and Contractor's Equipment]) or to any person (except persons insured under Sub-Clause 18.4 [Insurance for Contractor's Personnel]), which may arise out of the Contractor's performance of the Contract and occurring before the issue of the Performance Certificate.
- 15.2.2 This insurance shall be for a limit per occurrence of not less than the amount stated in **the Special Conditions of Contract**, with no limit on the number of occurrences. If an amount is not stated in the **Special Conditions of Contract**, this Sub-Clause shall not apply.
- 15.2.3 Unless otherwise stated in the Special Conditions, the insurances specified in this Sub-Clause:
- a) Shall be effected and maintained by the Contractor as insuring Party,
 - b) shall be in the joint names of the Parties,
 - c) shall be extended to cover liability for all loss and damage to Kenya Wildlife Service property (except things insured under Sub-Clause 18.2) arising out of the Contractor's performance of the Contract, and
 - d) may however exclude liability to the extent that it arises from:
 - i) Kenya Wildlife Service right to have the Permanent Works executed on, over, under, in or
 - ii) through any land, and to occupy this land for the Permanent Works,
 - iii) damage which is an unavoidable result of the Contractor's obligations to execute the

- 15.3.2 The insurance shall cover Kenya Wildlife Service and the Engineer against liability for claims, damages, losses and expenses (including legal fees and expenses) arising from injury, sickness, disease or death of any person employed by the Contractor or

any other of the Contractor's Personnel, except that this insurance may exclude losses and claims to the extent that they arise from any act or neglect of Kenya Wildlife Service or of Kenya Wildlife Service Personnel.

- 15.3.3 The insurance shall be maintained in full force and effect during the whole time that these personnel are assisting in the execution of the Works. For a Subcontractor's employees, the insurance may be effected by the Subcontractor, but the Contractor shall be responsible for compliance with this Clause.

16 FORCE MAJEURE

16.0 Definition of Force Majeure

- 16.0.1 In this Clause, "Force Majeure" means an exceptional event or circumstance:
- a) Which is beyond a Party's control,

16.1 Notice of Force Majeure

- 16.1.1 If a Party is or will be prevented from performing its substantial obligations under the Contract by Force Majeure, then it shall give notice to the other Party of the event or circumstances constituting the Force Majeure and shall specify the obligations, the performance of which is or will be prevented. The notice shall be given within 14 days after the Party became aware, or should have become aware, of the relevant event or circumstance constituting Force Majeure.
- 16.1.2 The Party shall, having given notice, be excused performance of its obligations for so long as such Force Majeure prevents it from performing them.
- 16.1.3 Notwithstanding any other provision of this Clause, Force Majeure shall not apply

to obligations of either Party to make payments to the other Party under the Contract.

16.2 Duty to Minimize Delay

Each Party shall at all times use all reasonable endeavors to minimize any delay in the performance of the Contract as a result of Force Majeure. A Party shall give notice to the other Party when it ceases to be affected by the Force Majeure.

16.3 Consequences of Force Majeure

16.3.1 If the Contractor is prevented from performing his substantial obligations under the Contract by Force Majeure of which notice has been given under Sub-Clause 19.2 [Notice of Force Majeure], and suffers delay and/ or incurs Cost by reason of such Force Majeure, the Contractor shall be entitled subject to Sub-Clause 20.1 [Contractor's Claims] to:

16.4 Force Majeure Affecting Subcontractor

If any Subcontractor is entitled under any contract or agreement relating to the Works to relief from force majeure on terms additional to or broader than those specified in this Clause, such additional or broader force majeure events or circumstances shall not excuse the Contractor's non-performance or entitle him to relief under this Clause.

16.5 Optional Termination, Payment and Release

16.5.1 If the execution of substantially all the Works in progress is prevented for a continuous period of 84 days by reason of Force Majeure of which notice has been given under Sub-Clause 19.2 [Notice of Force Majeure], or for multiple periods which total more than 140 days due to the same notified Force Majeure, then either Party may give to the other Party a notice of termination of the Contract. In this event, the termination shall take effect 7 days after the notice is given, and the Contractor shall proceed in accordance with Sub-Clause 16.3 [Cessation of Work and Removal of Contractor's Equipment].

- e) the Cost of repatriation of the Contractor's staff and lab or employed wholly in connection with the Works at the date of termination.

16.6 Release from Performance

Notwithstanding any other provision of this Clause, if any event or circumstance outside the control of the Parties (including, but not limited to, Force Majeure) arises which makes it impossible or unlawful for either or both Parties to fulfil its or their contractual obligations or which, under the law governing the Contract, entitles the Parties to be released from further performance of the Contract, then upon notice by either Party to the other Party of such event or circumstance:

- a) The Parties shall be discharged from further performance, without prejudice to the rights of either Party in respect of any previous breach of the Contract, and
- b) The sum payable by Kenya Wildlife Service to the Contractor shall be the same as would have been payable under Sub-Clause 19.6 [Optional Termination, Payment and Release] if the Contract had been terminated under Sub-Clause 19.6.

17. SETTLEMENT OF CLAIMS AND DISPUTES

17.0 Contractor's Claims

- 17.0.1 If the Contractor considers itself to be entitled to any extension of the Time for Completion and/or any additional payment, under any Clause of these Conditions or otherwise in connection with the Contract, the Contractor shall give Notice to the Engineer, describing the event or circumstance giving rise to the claim. The notice shall be given as soon as practicable, and not later than 30 days after the Contractor became aware, or should have become aware, of the event or circumstance.
- 17.0.2 If the Contractor fails to give notice of a claim within such period of 30 days, the Time for Completion shall not be extended, the Contractor shall not be entitled to additional payment, and Kenya Wildlife Service shall be discharged from all liability in connection with the claim. Otherwise, the following provisions of this Sub-Clause

shall apply.

- 17.03 The Contractor shall also submit any other notices which are required by the Contract, and supporting particulars for the claim, all as relevant to such event or circumstance.
- 17.04 The Contractor shall keep such contemporary records as may be necessary to substantiate any claim, either on the Site or at an other location acceptable to the Engineer. Without admitting Kenya Wildlife Service liability, the Engineer may, after receiving any notice under this Sub-Clause, monitor the record-keeping and/or instruct the Contractor to keep further contemporary records. The Contractor shall permit the Engineer to inspect all these records and shall (if instructed) submit copies to the Engineer.
- 17.05 Within 42 days after the Contractor became aware (or should have become aware) of the event or circumstance giving rise to the claim, or within such other period as may be proposed by the Contractor and approved by the Engineer, the Contractor shall send to the Engineer fully detailed claim which includes full supporting particulars of the basis of the claim and of the extension of time and/or additional payment claimed. If the event or circumstance giving rise to the claim has a continuing effect:
- a) This fully detailed claim shall be considered as interim;
 - b) The Contractor shall send further interim claims at monthly intervals, giving the accumulated delay and/or amount claimed, and such further particulars as the Engineer may reasonably require; and
 - c) The Contractor shall send a final claim within 30 days after the end of the effects resulting from the event or circumstance, or within such other period as may be proposed by the Contractor and approved by the Engineer.
- 17.06 Within 42 days after receiving a Notice of a claim or any further particulars supporting a previous claim, or within such other period as may be proposed by the Engineer and approved by the Contractor, the Engineer shall respond with approval, or with disapproval and detailed comments. He may also request any necessary further particulars but shall nevertheless give his response on the principles of the claim within the above defined time period.
- 17.07 Within the above defined period of 42 days, the Engineer shall proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine (i) the extension (if any) of the Time for Completion (before or after its expiry) in accordance with Sub-Clause 8.4 [Extension of Time for Completion], and/or (ii) the additional payment (if any) to which the Contractor is entitled under the Contract.
- 17.08 Each Payment Certificate shall include such additional payment for any claim as has been reasonably substantiated as due under the relevant provision of the Contract. Unless and until the particulars supplied are sufficient to substantiate the whole of the claim, the Contractor shall only be entitled to payment for such part of

the claim as he has been able to substantiate.

- 17.09 If the Engineer does not respond within the time frame defined in this Clause, either Party may consider that the claim is rejected by the Engineer and any of the Parties may refer the dispute for amicable settlement in accordance with Clause 20.3.
- 17.10 The requirements of this Sub-Clause are in addition to those of any other Sub-Clause which may apply to a claim. If the Contractor fails to comply with this or another Sub-Clause in relation to any claim, any extension of time and/or additional payment shall take account of the extent (if any) to which the failure has prevented or prejudiced proper investigation of the claim, unless the claim is excluded under the second paragraph of this Sub-Clause 20.3.

17.1 Kenya Wildlife Service Claims

- 17.1.1 If Kenya Wildlife Service considers itself to be entitled to any payment under any Clause of these Conditions or otherwise in connection with the Contract, and/or to any extension of the Defects Notification Period, Kenya Wildlife Service or the Engineer shall give notice and particulars to the Contractor. However, notice is not required for payments due under Sub-Clause 4.19 [Electricity, Water and Gas], under Sub-Clause 4.20 [Kenya Wildlife Service Equipment and Free-Issue Materials], or for other services requested by the Contractor.
- 17.1.2 The notice shall be given as soon as practicable and no longer than 30 days after Kenya Wildlife Service became aware, or should have become aware, of the event or circumstances giving rise to the claim. A notice relating to any extension of the Defects Notification Period shall be given before the expiry of such period.
- 17.1.3 The particulars shall specify the Clause or other basis of the claim and shall include substantiation of the amount and/or extension to which Kenya Wildlife Service considers itself to be entitled in connection with the Contract. The Engineer shall then proceed in accordance with Sub-Clause 3.5 [Determinations] to agree or determine (i) the amount (if any) which Kenya Wildlife Service is entitled to be paid by the Contractor, and/or (ii) the extension (if any) of the Defects Notification Period in accordance with Sub-Clause 11.3 [Extension of Defects Notification Period].
- 17.1.4 This amount may be included as a deduction in the Contract Price and Payment Certificates. Kenya Wildlife Service shall only be entitled to set off against or make any deduction from an amount certified in a Payment Certificate, or to otherwise claim against the Contractor, in accordance with this Sub-Clause.

17.2 Amicable Settlement

Where a notice of a claim has been given, both Parties shall attempt to settle the dispute amicably before the commencement of arbitration. However, unless both

Parties agree otherwise, the Party giving a notice of a claim in accordance with Sub-Clause 20.1 above should move to commence arbitration after 60 days from the day on which a notice of a claim was given, even if no attempt at an amicable settlement has been made.

17.3 Matters that may be referred to arbitration

Notwithstanding anything stated herein the following matters may be referred to arbitration before the practical completion of the Works or abandonment of the Works or termination of the Contract by either party:

- a) Whether or not the issue of an instruction by the Engineer is empowered by these Conditions.
- b) Whether or not a certificate has been improperly withheld or is not in accordance with these Conditions.
- c) Any dispute arising in respect risks arising from matters referred to in Clause 17.3 and Clause 19.
- e) All other matters shall only be referred to arbitration after the completion or alleged completion of the Works or termination or alleged termination of the Contract, unless Kenya Wildlife Service and the Contractor agree otherwise in writing.

17.4 Arbitration

- 17.4.1 Any claim or dispute between the Parties arising out of or in connection with the Contract not settled amicably in accordance with Sub-Clause 20.3 shall be finally settled by arbitration.
- 17.4.2 No arbitration proceedings shall be commenced on any claim or dispute where notice of a claim or dispute has not been given by the applying party within ninety days of the occurrence or discovery of the matter or issue giving rise to the dispute.

SECTION XI: PERFORMANCE BASED MAINTENANCE CONTRACT (PBC)

PART 1: IMPORTANT NOTICE TO TENDERS

- 1) This is a hybrid Tendering Document and has been prepared for the Procurement of Works under Performance Based and Unit Rate Based Wildlife Electric Fence Maintenance type of Contract. The contract covers an array of activities needed to achieve and maintain a functional fence, including many activities related to the **Management and Maintenance** (including Routine maintenance, spot improvement, emergency works and Periodic Maintenance) of the electric fence under contract.
- 2) This Standard Tender Document (STD) for Procurement of Wildlife Electric Fence Maintenance Works under Performance Based Term Contract has been prepared for use by Procurement Entities in Kenya in the procurement of fence maintenance works. Exclusive preference shall be given to citizen contractors using open tendering methods where the amounts are below the threshold set out in the Public Procurement and Disposal Act, 2015 and its attendant Regulations. Otherwise, any tender shall be through International Competitive Tendering (ICB) and National Competitive Tendering (NCB) procedures without discrimination.
- 3) In the Performance Based Contract (PBC), contractors compete among each other during the tendering process, by essentially proposing fixed lump-sum prices for bringing the electric fence to required conditional and functional level and then maintaining it at that level for a specified period. Payments made to the contractors are not based on quantities of works measured by unit prices for works “inputs” or physical works, but on measured ‘outputs’ reflecting the specified and target conditions of the fence under contract. This is expressed through ‘**Conditional** (*structurally sound in all aspects, service road and fire break well maintained and no overgrowth of vegetation along fence line*) and **Functional** (*min. voltage reading at 5KV*) **Levels**’, i.e., the Rehabilitation of the fence to pre-defined conditions (as required by the tendering documents in relation to material specifications), the maintenance service of ensuring specific functional Levels on the fence under contract, and specific improvements (as required by the tendering documents). All this represents outputs or outcomes. A monthly lump-sum remuneration paid to the Contractor will cover all physical and non-physical maintenance services provided by the Contractor, except for unforeseen emergency works which are remunerated separately as opposed to traditional fence construction and maintenance

contracts, where the Contractor is responsible for the execution of works which are normally defined by the Employer. The Contractor is paid on the basis of unit prices for different quantities of measured work items, i.e., a contract based on “inputs” to the works.

For example, the contractor is not paid for say, 50m long by 3m width fire break along fence line cleared of vegetation growth (his actual work input) in a certain month, but for ensuring there is no vegetation growth within the fire break at all times (the output of his efforts). This means that in some months the Contractor will be paid the agreed standard monthly lump sum amount even though much work has not been done. In other words, it is possible that during some months, the contractor will have to carry out a rather large amount of physical works in order to comply with the required conditional and functional Levels and very little work during other months.

The agreed monthly payment for maintenance works and services will be made to the Contractor if he has complied, during the month for which the payment is to be made, with the agreed Conditional and Functional Levels on the Electric Fence under contract. Together with his monthly invoice, the Contractor will report the result of his own evaluation of compliance with the required Conditional and Functional Levels, based on his own monitoring system which is mandatory. His statement will then be verified by the Employer or his representative (supervisor) through joint inspection with an Engineer or appointed representative. If the Conditional and Functional Levels are not met, payments are reduced, based on a schedule given in the contract. Payments may even be suspended, and the contract cancelled, if the contractor fails during an extended period to achieve specified minimum threshold values of Conditional and Functional Levels. **This component of contract describes the formulas used to calculate payment reduction and potential contract suspensions.**

- 4) The unit rate-based term contract on the hand include:
- a) Carrying out **Rehabilitation Works** to bring the Electric Fence up to pre-defined conditions.
 - b) **Improvement/upgrading Works** specified by the Employer aiming at adding new characteristics to the Electric Fence in response to new translocated wildlife, safety or other conditions.
 - c) **Emergency Works** needed to reinstate the Electric Fence after damage has occurred as a result of natural phenomena with imponderable consequences under the conditions defined in the contract.

The Rehabilitation and Improvement Works where explicitly specified by the Employer in the contract are quoted on the basis of measurable output quantities and Paid as performed. In order to be entitled to the monthly payment for maintenance services, the Contractor must ensure that the Electric Fence under contract comply with the Conditional and Functional Levels which have been specified in the tendering document.

- 5) When improvement, rehabilitation or emergency works are required, a well-designed bill of quantities defining specific outputs for tenderers to price and, later on, allow measurement and payment of the Contractor is provided. Emergency works, although impossible to quantify in advance, will occasionally be necessary. To allow tenderers to offer prices for Emergency Works, a unit price bill of quantities (similar for civil works under unit prices) / shall be prepared for tenderers to price for tender evaluation purposes. Later on, these unit prices and real measured volumes of Emergency Works executed will be used for payments.
- 6) Another major difference is that the Contractor is responsible for deciding on the works necessary to reach the required Conditional and Functional Levels, and the durability and performance of the Electric Fence over a longer period. Although the design of the Rehabilitation, Improvement or Emergency works to be carried out is under the responsibility of the Employer, a good preparatory engineering work is required to be prepared by the Contractor for the design produced by him and programming of the Works and Maintenance services. It is necessary to prepare comprehensive information on the actual condition of the Electric Fence covered by the contract.
- 7) Minimum Electric Fence Conditions and Functional Levels are defined through Conditional and Functional levels and, and these are used under the PBC to define and measure the desired performance of the Contractor. In the PBC, the defined performance measures are thus the accepted minimum thresholds for the Condition and Functional levels of the Electric Fence for which the Contractor is responsible.
- 8) The performance criteria will cover all aspects of the contract and take account of the fact that different sub-areas within the contract area might require different measures of Conditional and Functional Levels. Criteria has been defined at two different categories:
 - (a) **Functional** measures,
 - (b) **Fence Durability** measures,
- 9) A fundamental feature of the PBC is that any type of firm or business venture having the necessary technical, managerial and financial capacity to fulfil the contract is eligible and not necessarily the traditional works contractor. However, for this contract, the contractor awarded construction of new works shall proceed to maintain the fence over a specified period and as stipulated in the Conditions of Contract, the contractor is responsible for designing and carrying out the works, services and actions he believes are necessary in order to achieve and maintain both conditional and functional Levels stated

in the contract. The Levels are defined based on the ability of the fence to offer deterrence to any intrusion by the public or wildlife. If the said Levels are not achieved in any given month, the payment for that month may be reduced or even suspended.

10) Under the Performance based Contract (PBC), the Contractor has a strong financial incentive to be both efficient and effective whenever he undertakes work. In order to maximize profits, he is able to reduce his activities to the smallest possible volume of intelligently designed interventions, which nevertheless ensure that pre-defined indicators of Service Level are achieved and maintained over time. This type of contract makes it necessary for the Contractor to have a good management capacity. Here, "management" means the capability to define, optimize and carry out on a timely basis the physical interventions which are needed in the short, medium and long term. This is done in order to guarantee that the electric fence remain above the agreed Levels. In other words, within the contract limitations and those required to comply with local legislation, technical and performance specifications and environmental and social regulations, the Contractor is entitled to independently define: (i) what to do, (ii) where to do it, (iii) how to do it, and (iv) when to do it. The role of the Project Manager on behalf of the Employer is to enforce the contract by verifying compliance with the agreed Levels and with all applicable legislation and regulations.

11) Maintenance of wildlife electric fence includes both **routine** and **periodic** tasks. Routine maintenance consists of many different tasks frequently necessary to maintain the function of the fence (such as control of vegetation growth along fence line, cleaning of drainage, ensuring 'Hatari' signs are in place, etc.). Periodic maintenance consists of predictable and more costly measures of a less frequent nature designed to avoid fence degradation (such as replacement and tensioning of HTS wires or mesh, replacement of any termite infested or cracked line, strainer posts and corner assemblies, grading of service road where necessary, drainage work, resurfacing, etc.). Intelligent management, the timeliness of interventions and the adequacy of technical solutions are critical. When Rehabilitation Works and Improvement Works are not specifically required in the tendering documents, it is expected that in order to comply with the contract, the Contractor will most likely have to carry out different types of works, including some small initial rehabilitation and improvements, routine maintenance activities and periodic maintenance works. The definition of the exact nature of the works, their timing, their costing and their implementation is left to the judgment of the Contractor. This means that his capacity must be above the usual capacity of a traditional civil works contractor. In fact, an essential attribute is the capacity to manage electric fence, while the actual physical execution may either be carried out by the Contractor himself, or by different specialized firms participating in a Joint Venture with the main contractor, or

under subcontracts. Joint Ventures may include Engineering firms and medium, small and even micro-enterprises.

Tenderers will present their financial offer as appropriate for:

- the Performance Based **Maintenance Services** in the form of the amount of the monthly lump-sum payment demanded by the tenderer according to the conditions of contract (this will be a monthly amount applicable throughout the duration of the contract);
 - the **Rehabilitation Works** (if so, required in the Instructions to Bidders), in the form of a lump-sum amount, while indicating the quantities of measurable outputs to be executed in order that the electric fence achieves the performance standards specified in the tendering documents. Payments will be made in accordance with the progress in the execution of those measured outputs;
 - the **Improvement Works** (if so required and for the improvements indicated in the tendering documents) in the form of unit prices for outputs of each type of improvement works; payments for improvements will be made in accordance with quoted unit prices for those outputs; and
 - Unit prices for **Emergency Works** in the form of a traditional bill of quantities. Payments will be made for each emergency on a case-by-case basis, in the amount of a lump-sum value estimated by the Contractor and approved by the Employer, on the basis of the estimated quantities and on the quoted unit process.
- 12) Another important aspect in the Performance type of contract is for the contractor and Employer to enter into a long-term relationship whereby the contractor takes over more responsibility for managing the condition of the Electric fence and is rewarded by a longer-term contract than is traditional; sometimes several years.
- 13) In case of any conflict between the provisions outlined in this standard tender document and The Public Procurement and Disposal Act, 2015 and its attendant Regulations 2006, the latter shall prevail.

PART 2: CONDITIONS OF CONTRACT

1. GENERAL CONDITIONS OF CONTRACT (GCC)

The General Conditions Part I and Conditions for Particular Applications Part II shall apply.

2. PARTICULAR CONDITIONS OF CONTRACT (PCC)

The following Particular Conditions shall supplement the Conditions of Contract. They are to be completed by the Employer and presented as part of the Tendering Documents. Whenever there is a conflict, the provisions herein shall prevail over those in the GCC.

3.4. Emergency Procedures and Contingency Plan

If required in the Particular Conditions of Contract (PCC) the Program of Performance shall include an Emergency Procedures and Contingency Plan which shall establish the roles, practices and procedures during specific types of emergency events identified in the plans and contingency plans associated with the closure of roads. The Emergency Procedures and Contingency Plan must be developed by the Contractor and agreed with the Engineer and any other stakeholders the Engineer may identify.

The purpose of the Emergency Procedures and Contingency Plan is to ensure the safety of the Contractor's personnel and road users in the case of emergency and/or road closure. It should include:

- an effective communication and event recording system
- the name, contact number and specific duties of the Contractor's personnel nominated to respond to an emergency event
- the contact number of other parties who need to be notified in cases of emergency events, e.g., police
- detailed response procedures for all emergency events
- possible detour routes in the event of road closure

4. **Condition and Functional Level Criteria**

The Contractor is required to carry out the Maintenance Services and to maintain the specific Electric Fence related assets and items during the contract duration in compliance with the Fence Performance Standards as defined by the Service Criteria as stipulated hereunder.

The Employer requires the Contractor to maintain the Electric Fence under the contract to remain in sound structural state and functional with ability to offer barrier to any intruder including wildlife and the public. In order that the Contractor can achieve such, criteria for condition and functional levels must be adhered to as below

- 1) **Conditional levels** – the fence is structurally sound in all aspects, no overgrowth of vegetation along fence line, fire breaks cleared of any vegetation growth, and service road well maintained, motorable and drainages cleared of any debris.
- 2) **Functional levels** – the minimum voltage reading along the fence line is **5KV**. The security management system remains functional and the central command room receives real time monitoring information.

5. **Self-Control Unit (SCU)**

The Contractor is required to establish a Self-Control Unit within his project organization throughout execution and completion of the Works and Services to the satisfaction of the Engineer. The roles of the SCU:

1. For conducting self-inspection to verify the degree of compliance with the Electric Fence Performance Standards as defined by the Service Levels and maintain the reporting system of self-inspection.
2. Assessment of the Electric fence. The Self-Control Unit shall have a complete knowledge of the road condition, both on and off carriageway, at all times by carrying out patrolling, to the satisfaction of the Engineer.
3. The Self-Control Unit is responsible for Gathering information required by the Contractor to prepare the Monthly Statement.
4. The carrying out, in close cooperation with the Engineer, the Formal and Informal Inspections of condition and functional levels which will take place as required.

The Contractor is required to assign a technically qualified and trained person, or persons, to continuously verify the degree of compliance of condition and functional Levels. The Contractor is also required to arrange a satisfactory means of mobility for conducting inspections to the satisfaction of the Engineer.

6. Site Inspection and Reporting

The Contractor is required to undertake the following management tasks to ensure the full integrity of the Electric Fence throughout execution and performance of the Works and Maintenance Services.

6.1. Site Condition Assessment before Commencement of Works and Services

The Contractor shall conduct initial site condition assessment before commencement of the Works and Services under the contract. In case any defects and deficiencies are discovered under the assessment, the Contractor shall notify the Engineer by submitting the Defect Detection and Rectification List as attached to the **Appendix 4** of the Performance Specifications and upon agreement of the Engineer, the Contractor shall carry out rectification works as the Rehabilitation Works.

In case the Contractor discovers cases of illegal encroachment and illegal dumping of unwanted materials or otherwise illegal actions by the third parties, the Contractor shall notify the Engineer for further instructions as required.

6.2. Ad hoc Inspection

The Engineer may carry out ad-hoc inspections to verify the degree of compliance with the Electric Fence Performance Standards as defined by the condition and functional Levels. He may do so on his own initiative, at anytime and anywhere on the fence under the contract. If he detects any stretches where the both the condition and functional levels are not met, he is required to notify the Contractor within 24 hours in writing as the Corrective Order, to enable the Contractor to take remedial action as soon as possible. The results of ad-hoc inspections may not be used by the Engineer for purposes of correcting the Contractor's monthly statements or applying penalties, except for cases in which the voltage readings has been completely interrupted due to the negligence and tardy action by the Contractor.

7. Monthly Statement

7.1. Preparation for Monthly Statement

| Documentation | | Reduction Weight in case of Non-Compliance |
|---------------|---|---|
| 1. | Documentation (Submission of documents specified under Programme of Performance) (% doc) | 4% of the monthly lump sum for one km applied if the document is not submitted. |
| 2. | Structural Soundness: (% ss) | 40% of the monthly lump sum for one km applied to each one km section which does not comply. |

| | | | |
|----|---|---|-------------------|
| 3. | Voltage Reading: (%vr) | 40% of the monthly lump sum for one km applied to each one km section which does not comply. | For the Works and |
| 3. | Maintenance of Service Road and Fire Breaks: (%sst) | 20% of the monthly lump sum for one km applied to each one km section which does not comply. | |
| 4. | Visibility of Hatari Signs: (%hs) | 20% of the monthly lump sum for one km applied to each one km section which does not comply | |
| 5. | Drainage Capability: (%dc) | 22% of the monthly lump sum for one km applied to each one km section which does not comply | |
| 6. | Vegetation Control: (%vc) | 24% of the monthly lump sum for one km applied to each one km section which does not comply | |
| 7. | Maintenance Security Management System: (%sms) | 30% of the monthly lump sum for one km applied to each one km section which does not comply | |

Maintenance Services executed and performed during the month, the Monthly Statement shall be prepared by the Contractor with the format of Monthly Statement as attached (**Appendix 7**).

For the Maintenance Services, the Contractor shall take the following actions;

- 1) Prior to compilation of the Monthly Statement for each month, the Contractor is required to prepare the Payment Reduction Calculation Table for the month by utilizing the result of the most recent self-inspection recorded in Self Inspection Result Record Form to determine the total length of non-compliant sections for each Service Scope and for
- 2) Calculation of the reductions required for the month by determining the percentages of non-compliant sections for each Service Scope. The format of Payment Reduction Calculation Table is attached as **Appendix 9**.
- 3) The prepared Payment Reduction Calculation Table shall become the basis of the payment request for the Maintenance Services.
- 4) Upon completion of Formal Inspection, the amounts indicated on the Monthly Statement and the Payment Reduction Calculation Table will be adjusted, if required. Such modified Monthly Statement and Payment Reduction Calculation Table shall be countersigned by the Engineer to sign it and present it to the Employer for payment,

and to the Contractor for information.

7.2. Reduction Weighting for Non-Compliance on Maintenance Services

In accordance with the relevant clauses of the Performance Specifications and GCC, payment reduction is applied in case of non-compliance with Functional Levels.

The total aggregate weighting of 200% is applied to various Condition and Functional Criteria and Documentation. The reduction weighting for each is indicated below.

(% xx indicates the percentage of either Condition or Functional level criteria for non-compliance during the month for criteria xx.

The amount of reduction for the Maintenance Services will be calculated as follows:

$$\%Total = (0.04 \times \%doc) + (0.40 \times \%ss) + (0.4 \times \%vr) + (0.2 \times \%sst) + (0.2 \times \%hs) + (0.22 \times \%dc) + (0.24 \times \%vc) + (0.3 \times \%sms)$$

If the Contractor fails to remedy a cause of non-compliance for which a payment reduction has already been applied, the amount of the payment reduction increases month by month for that cause of non-compliance, without a ceiling being applied, until compliance is established. The amount of payment reduction for such case will be calculated as follows;

- 1) If the non-compliance has not been remedied within the first thirty days of non-compliance, additional payment reduction for periods beyond 30 days will be split into each 30 day.
- 2) The additional payment reduction for periods beyond 30 days is calculated using the formula indicated below,

$$PR = 2^n PR_0, \text{ where}$$

$$n = \left\lceil \frac{J-1}{30} \right\rceil \text{ rounded up to full number (without decimals)}$$

J = number of days of non-compliance beyond thirty days

PR₀ is the amount of the initial payment reduction.

8. Formal Inspection

The Formal Inspection shall be carried out jointly by the Engineer at the end of each month. The Engineer shall notify the Contractor that he intends to carry out Formal Inspection in writing within 7 days of notification. The Contractor shall inform the Engineer of the proposed date and time and shall prepare for Formal Inspection. The main purpose of carrying out the Formal Inspection is to enable the Engineer to verify the information presented in the Contractor's Monthly Statement with the actual observed and measured conditions on the site.

8.1. Procedure for Formal Inspection

The Contractor shall submit the following documents as indicated in Table 10.1 to the Engineer for scrutiny prior to the Formal Inspection after the receipt of notification of

carrying out Formal Inspection. The Contractor shall provide sufficient time to the Engineer to allow full scrutiny of the submitted documents.

Table 10.1 List of Documents for Formal Inspection

The criteria of each Condition and functional levels shall be checked jointly by the Engineer at sections selected by the Engineer based on visual appearance. The Engineer shall be the sole judge of compliance. If a specified criterion is not met, the one-kilometre section in which the deficit occurs will be judged non-compliant in accordance with the Self-Inspection Result Record Form.

The Engineer shall prepare a brief Memorandum describing (i) the general circumstances of the site visit, including date, fence sections visited, persons present, etc., (ii) any non-compliance which may have been detected, and (iii) the time granted by the Engineer to the Contractor to remedy the detected defects.

The results of Formal Inspection on Condition and Functional Levels will be recorded by the Engineer in this Memorandum. The Memorandum will state the type and location of any non-compliance detected, in particular those non-compliances already shown in the most recent Self Inspection Result Record Form provided by the Contractor as part of the Monthly Statement. For each individual case of non-compliance, the Engineer will determine a date by which the Contractor must have completed the necessary measures in order to remedy the cause of the non-compliance. A follow-up site visit is therefore necessary at the date fixed by the Engineer, or soon thereafter, in order to verify that the Contractor has indeed remedied the cause of non-compliance. If at the date indicated in the Memorandum, the Contractor has not remedied the cause for non-compliance, independent of the reason given for their failure to do so, the Contractor is subject to payment reduction in accordance with the relevant clauses of the Performance Specifications and GCC.

Based on the outcome of the Formal Inspection and subsequent remedies by the Contractor or otherwise, the Engineer will correct any possible errors or misrepresentations in the Contractor's Monthly Statement, countersign it and present it to the Employer for payment, and to the Contractor for information.

9. Performance Monitoring by the Employer

The Contractor shall acknowledge that the Employer encourages adoption of proactive approach by the Contractor on performing the Maintenance Services. To maintain such approach, the Employer shall have the power to entrust the Engineer to conduct monthly performance monitoring on the Contractor.

- 1) Performance monitoring will be conducted on condition and functional level compliance, self-control unit performance, work safety performance, performance on environment and social management, corrective order management and statutory compliance. The format of Monthly Evaluation Form is attached as Appendix 9, for the purpose of performance monitoring.
- 2) The result of performance monitoring of each month will be used for the evaluation of the Contractor at the end of each year. Evaluation of the Contractor shall be carried out by the Engineer using the Contract Evaluation Tally Sheet, which is attached as Appendix 10.

The total aggregate weighting of 100% is applied to 6 criteria in 1) above, with the weighting of 50% conditional and functional levels compliance, 20% on work safety performance, 0% on statutory compliance and the remaining criteria each weighing 10%.

- 3) The result of each month on each criterion will be evaluated either a pass or a failure. The tally will be made at the end of each month, collected to the end of the year and to arrive at the performance of the criterion as the percentage of pass attained during the year. The respective weight will be applied to arrive at the evaluation score, with the maximum score of 100 and the minimum score of 0. For statutory compliance, the evaluation score will not be tabulated, but a penalty of 20 will be imposed in case the Contractor faces violation on statutory compliance at least once in a year.

10. Handover Report

Immediately prior to the completion of the contract, the Contractor shall prepare a Handover Report and submit to the employer. The purpose of the Handover Report is to provide a smooth transition to the next contract and ensure that the next contractor is aware of any outstanding issues. The Report will:

- (a) Summarize any unresolved issues;
- (b) Include the most recent complete set of data on the roads covered by the contract, and
- (c) Provide the following details as shall be agreed by the Engineer:
 - (i) A schedule of outstanding defects
 - (ii) Any unresolved issues, especially those that may impact on the next Contractor

- (iii) Details of any sensitive issues
- (iv) Any on-going special monitoring/maintenance needs.

3. BILL OF QUANTITIES

1. PREAMBLE TO BILL OF QUANTITIES
2. BILL OF QUANTITIES FOR PBC MAINTENANCE SERVICES
3. BILL OF QUANTITIES FOR EMERGENCY WORKS
4. SUMMARY OF BILL OF QUANTITIES

1. PREAMBLE TO BILL OF QUANTITIES

- a) The Bill of Quantities shall form part of the Contract Documents and is to be read in conjunction with the Instructions to Tenderers, General Conditions of Contract (GCC), Particular Conditions of Contract (PCC), Specifications and Drawings.
- b) The brief description of the items in the Bill of Quantities is purely for the purpose of identification, and in no way modifies or supersedes the detailed descriptions given in GCC, PCC and Specifications for the full direction and description of the Works and Maintenance Services.
- c) The quantities set forth in the Bill of Quantities for the Works are estimated and provisional, representing substantially the Works to be carried out, and are given to provide a common basis for tendering and comparison of Tenders. There is no guarantee to the Contractor that he will be required to carry out all the quantities of Works indicated under any one particular item or group of items in the Bill of Quantities. The basis of payment shall be the Contractor's rates and the quantities of Works actually done in fulfilment of his obligation under the Contract.
- d) The prices and unit rates in the Bills of Quantities are to be the full and all-inclusive value of the work described under the items, including all costs and expenses which may be necessary and all general risks, liabilities and obligations set forth or implied in the documents on which the tender is based. All duties, taxes and other levies payable by the Contractor under the Contract, or for any other cause prior to the deadline for submission of tenders, shall be included in the rates and prices and the total Tender Price submitted by the tenderer.
- e) Each price or unit rate inserted in the Bills of Quantities should be a realistic estimate for completing the activity or activities described under that particular item and the tenderer is advised against inserting a price or rate against any item contrary to this instruction.
- f) Every rate entered in the Bills of Quantities, whether or not such rate is associated with a quantity, shall form part of the Contract. The Employer shall have the right to call for any item of work contained in the Bills of Quantities, and such items of work to be paid for at the rate entered by the tenderer and it is the intention of the Employer to take full advantage of unbalanced low rates.
- g) The prices and rates inserted in the Bills of Quantities will be used for valuing work executed, and the Engineer will measure the whole of the Works executed in accordance with this Contract. The Maintenance Services will not be measured.

However, price reduction will be carried out for not achieving the defined Service levels as inspected by the Engineer under Formal Inspection.

- h) A price or rate shall be entered in ink against every item in the Bill of Quantities with the exception of items, which already have provisional sums, affixed thereto. The Tenderers are reminded that no “nil” or “included” rates or “lump-sum” discounts will be accepted. The rates for various items should include discounts if any. Tenderers who fail to comply will be disqualified.
- i) Provisional sums (including Day works) in the Bill of Quantities shall be expended in whole or in part at the discretion of the Engineer in accordance with Clause 58.2 and 52.4 of the GCC.
- j) The price and rates entered in the Bill of Quantities shall, except insofar as it is otherwise provided under the Contract, include all constructional plant to be used, labour, insurance, supervision, compliance, testing, materials, erection, maintenance or works, overheads and profits, taxes and duties together with all general risks, liabilities and obligations set out or implied in the Contract, transport, electricity and telephones, water, use and replenishment of all consumables, including those required under the Contract by the Engineer and his staff.
