WHAT TO TAKE WITH YOU

Personal effects, clean drinking water, food, camping equipment if the visitor intends to stay overnight in the camp. Also important are; Camera, binoculars, sunscreen, insect repellent, first aid kit, sunglasses and reserve car fuel if intending to be in the park longer.

HOW TO GET THERE

By road: Travel 156 km north west of Nairobi on the main A104 road. The most commonly used route into the park is via the main gate, 4 km from Nakuru Town Centre. Alternatively, the park is readily accessible from the main Nairobi Nakuru highway at Lanet Gate. Nderit Gate is commonly used by visitors accessing the park from Maasai Mara or Elementaita.

By Air: Naishi airstrip located just next to Naishi guest house is serviceable.

*Visitors accessing the Park from Nairobi are encouraged to use Lanet Gate so as to avoid traffic in Nakuru CBD.

LAKE NAKURU NATIONAL PARK

A Beautiful Haven

INTRODUCTION

Resting squarely on the floor of the Great Rift Valley and surrounded by the characteristic woody and bushy grassland, her sky mirrored lake waters extending to an expansive mass of semi-alkaline water, Lake Nakuru National Park is a ball of beautiful sights and waiting to be explored. A wide ecological diversity, varied wildlife habitats, plant and animal species await the wild outdoor lovers.

The park is a uniquely rewarding game-viewing destination and a sanctuary for both black and white rhinos.

KEY ATTRACTIONS & ACTIVITIES

The Park is motor-able and pleasurable to drive around due to its easy to maneuver topography. Being an ornithological paradise, the park hosts about 450 species of birds including water, fish-eating, terrestrial and migratory birds to include the pelican, fish eagle, secretary bird, heron, egret, hammerkop and grebe. Catch the best views of the lake from the park's vantage points that include Baboon Cliff, Lion Hill and Out of Africa Hill.

If you love to relax, chill and breathe, discover some great picnic spaces at the Baboon Cliff, Out of Africa Hill and Makalia waterfalls. Established as Kenya's first rhino sanctuary, the Park hosts one of the largest black rhino concentrations in the country while substantial numbers of white rhino have also been introduced. The acacia woodlands shelter herds of graceful impalas, shaggy waterbucks and the shy bushbuck. The rocky outcrops provide a perfect habitat for the rock hyrax. Present carnivores include lions

and leopards. Other wildlife species include the spotted and striped hyena, serval cats as well as the silver-backed and side-striped jackal, civet, genet and mongoose. Giraffes, zebras, buffalos are also present. The most visible primates are the somber olive baboons and the mysterious black-faced vervet monkey, while dignified troops of colobus monkey often prance among the trees.

Conspicuous hills that are ready land marks include Enasoit hill, honeymoon hill and the lion hill ridge. About 550 different plant species dot the picturesque landscape and yellow acacia woodlands. Euphorbia tree species are being assimilated after a past destruction by fire in the Park. Lake flooding in 2011 expanded the lake considerably and upset the chemical balance that is behind its ecosystem. Due to the huge amounts of water, the alkaline levels supporting the algae that flamingoes feed on were diluted and thus the decline in their numbers.

ACCOMMODATION

Stay in the Wild, explore, create memories

Set in the quietude of nature, KWS offers a modest and wide range of self-catering accommodation options targeting the budget traveler.
